

# Data Sheet - Causerie for Windows

## “Unified” Messenger for your desktop

Causerie is an easily configurable chat tool, complete with skins and a fully customizable user interface. Causerie allows you to login to six simultaneous accounts supporting Yahoo, MSN, AOL, Jabber, ICQ and Google Talk. You may also login to two accounts of a given messenger type (Yahoo / MSN / AOL / Jabber / ICQ / Google Talk). While supporting the standard features such as chat, file transfer, group chat, chat rooms, buddy icons, quick text, status messages, buddy maintenance (Add/Delete buddies), Causerie provides capabilities not possible with original network clients like Bots (Information retrieval from 3<sup>rd</sup> party web sites or your own back office software applications), encryption, server side archiving, chat text filtering etc.

### Client Requirements:

- Any Windows OS with .Net framework loaded.
- Internet connection
- Minimum of 256 MB RAM
